BIOGRAPHICAL NOTE

Hannah Marie Wormington was born in Denver, Colorado in 1914. She studied archaeology with E.B. Renaud and earned a B.A. from the University of Denver in 1935. After graduating from college, she traveled to France where she worked under Henri Martin at a Paleolithic excavation in the Dordogne. She retained an interest in French archaeology. Returning to Denver from her studies abroad, she was hired by the Denver Museum of Natural History as a staff archaeologist. In 1937, she became curator of archaeology, establishing the museum's status as an important center for Paleo-Indian research. She remained at the museum until 1968. She received her doctorate in 1954, becoming the first Harvard (Radcliffe) female Ph.D. to specialize in archaeology.

While at the Denver Museum of Natural History, she cataloged the Lindenmeier material in the collection (1936) and excavated the Johnson Site (a Folsom camp) near La Porte, Colorado. Starting in 1937, she excavated a series of rock shelters in Montrose County, Colorado, Grand County, Utah, and Mesa County, Colorado. She surveyed prehistoric migration routes of ancient hunters in the Province of Alberta, Canada in 1955 and 1956. In the 1960s, she worked at the Frazier Agate Basin site and with Joe Ben Wheat at the Jurgens Cody site at the Jurgens Cody site in Weld County, Colorado. She also served as a consultant on an excavation of mammoth and associated material in the Valley of Mexico (1952) and of a human skeleton near Turin, Iowa (1955); excavations at Onion Portage, Alaska (1963), the Scottsbluff butchering site near Chadron, Nebraska (1971), and Hot Springs Mammoth Site, South Dakota (1977). Wormington also served as a visiting or adjunct professor with Arizona State University, Colorado College, the University of Colorado, and the University of Wyoming.

Wormington became the first women president of the Society for American Archaeology in 1967. She received many awards including a Guggenheim Fellowship in 1970, Colorado's State Archaeologist's Award in 1977, an Honorary Doctorate from Colorado State University in 1977, and the Society of American Archaeology's Distinguished Service Award in 1983.

Hannah Marie Wormington was an American archaeologist known for her study of Paleo-Indians in the Southwest. She contributed greatly to the body of research of prehistoric cultures; among those were the Fremont of Utah, and the Uncompahgre of Colorado. Her most significant publications were *Ancient Man in North America* (1939b) and *Prehistoric Indians of the Southwest* (1947). Both are considered classics for synthesizing an incredible amount of data on the subject of Prehistoric Indians.

SCOPE AND CONTENT NOTE

Wormington's papers consist of correspondence, field notes and affiliated materials, lecture notes, manuscripts, photographs, professional, teaching materials, and writings by her students and colleagues. The papers reflect many aspects of Wormington's

professional life including her archaeological work, professional development and teaching career, although there is relatively little concerning her curatorial work at the Denver Museum of Natural History. Correspondents include James M. Adovasio, Larry D. Agenbroad, George Agogino, Robert Ashton, Marie Madeleine Baboulet John O. Brew, Alan L. Bryan, E. Stephen Cassells, John L. Cotter, Richard D. Daugherty, Richard G. Forbis, George C. Frison, F.M. Fryxell, Julian Hayden, C. Vance Haynes, William N. Irving, Henry Irwin, Cynthia Irwin-Williams, Elaine Johnson, Ruthann Knudson, L.S.B. Leakey, Barbara Purdy, Bruce E. Rippeteau, Richard Shulter, Dennis J. Stanford, Christie G. Turner, Sol Tax, and Sharon Young

EXTENT

58 boxes, 1 lantern slide tray, and 1 oversized box, 25.8 linear feet

SERIES DESCRIPTIONS AND BOX LIST

SERIES 1: CORRESPONDENCE

7 boxes, 2.92 linear feet

This series consists solely of correspondence (c. 1935-1994) between H. Marie Wormington and various colleagues, students, friends, and relatives. Generally, the documents are arranged alphabetically by surname of the correspondent. Correspondents that exchanged at least ten letters with H. Marie Wormington have been assigned folders labeled with their surname. Correspondents that exchanged less than ten letters have been grouped together and placed into folders labeled with the letter of the alphabet their surname begins with. To preserve the series' original order, there are some instances in which correspondence is arranged alphabetically by subject.

SERIES 2: SITE FILES

7 boxes, 2.92 linear feet

This series contains field notes, reports, data, charts, illustrations, correspondence, and a variety of other materials pertaining to the many archaeological sites H. Marie Wormington excavated over the span of her career. Sites excavated by colleagues are included here as well. Arrangement is alphabetical by site name.

SERIES 6: PAPERS WRITTEN BY OTHERS

8 boxes, 3.13 linear feet

This series contains dissertations, book drafts, and some articles, as well as correspondence, data, and notes written by colleagues and students of H. Marie Wormington. Arrangement is alphabetical by author's surname. In the case that no name is provided or if multiple authors contributed to a body of work, arrangement is alphabetical by title.

SERIES 7: ARTICLES

4 boxes, 1.67 linear feet

This series is comprised solely of articles published in scholarly journals. They exist apart from the series “Papers Written by Others” mostly because they are shorter in length. Arrangement is alphabetical by author’s surname. To preserve the series’ original order there are cases in which many related articles are grouped together. Arrangement is therefore alphabetical by subject. The same holds true if a name is not provided.

Entire journals and newsletters have been filed here as a sub-series. Arrangement is alphabetical by name of journal.
